

Lightbox Demo PDF

A compact sample file for preview, navigation, zoom, rotation, and annotation tests.

What this document covers

This replacement PDF keeps the same filename as the original demo asset: flow.pdf. It contains multiple pages, simple vector graphics, a checklist table, and blank zones for drawing tests. Use it to confirm that the PDF viewer loads inline and that toolbar actions stay responsive.

Preview

Open inside the Lightbox.
Change pages without leaving the modal.
Confirm toolbar spacing on narrow screens.

Annotate

Try signature mode on page 3.
Draw rectangles and ellipses.
Download or print the marked version.

Expected viewer behavior

- No iframe should be created for this PDF.
- Arrow keys should turn PDF pages while the viewer has focus.
- Esc should close drawing mode first, then close the Lightbox.

Viewer Checklist

Use this page for navigation, zoom, rotation, download, and print checks.

Area	Action	Expected result
Navigation	Next, previous, first, last page buttons	Page number updates and content changes cleanly
Zoom	Zoom in, zoom out, fit width, fit page	Canvas remains sharp and centered
Rotation	Rotate left and right	Page orientation changes without clipping
Download	Download original or annotated PDF	File saves with current annotations when present
Print	Print through viewer toolbar	Print dialog opens from the generated PDF
Keyboard	Esc and arrow keys	Shortcut behavior stays scoped to the PDF viewer

Responsive check

Resize the browser to a narrow viewport and open this PDF again.
The inner PDF toolbar should not overlap the outer Lightbox close button or page counter.

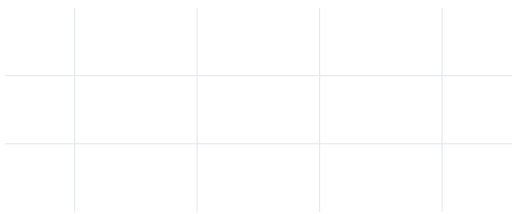

Annotation Test Page

Draw on the boxes below, then download or print the annotated result.

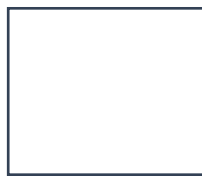

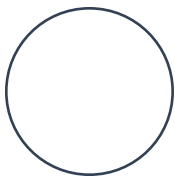

Signature area

Sign or sketch above this line

Rectangle test zone

Ellipse test zone

Mixed vector shapes

These simple objects make rotation and zoom checks easier.

They should stay sharp at high zoom levels.
